

Reliable and Accurate

BoNee bladder injection needle for precise placement and delivery

The Coloplast BoNee® bladder injection needle, developed in partnership with physicians, delivers low viscosity medications precisely where intended.

4 mm tip needle:

Designed to safely control needle depth into the bladder wall, which eliminates the risk of perforation and fluid loss.

Protection cap:

Blue protection cap covers the needle tip to prevent damage when passed through the cystoscope.

22 gauge needle:

Small needle size to reduce bleeding, tissue damage and pain.

35 cm or 70 cm length:

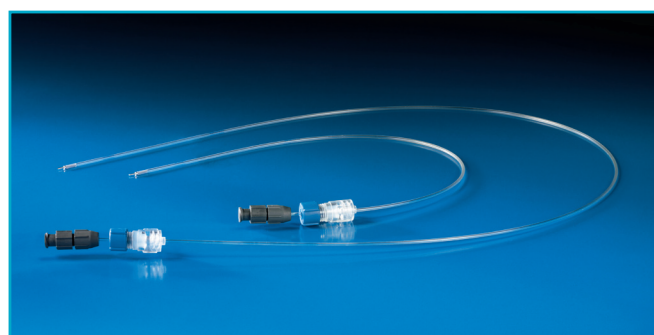

Two sizes available to meet your needs:
35 cm – for use with a rigid cystoscope.
70 cm – for use with a flexible or rigid cystoscope.

5 French:

BoNee can be used with a small size cystoscope (5 FR), to reduce patient discomfort during the procedure.

Flexible and strong body:

BoNee allows injection in any part of the bladder without kinking.

Catalog Number	Description
NBI035	35 cm, use with rigid cystoscope.
NBI070	70 cm, use with flexible or rigid cystoscope.

Individually packed - Sterile Ethylene Oxide (EO).
Minimum order of 5.

Ostomy Care
Urology & Continence Care
Wound & Skin Care

Coloplast develops products and services that make life easier for people with very personal and private medical conditions. Working closely with the people who use our products, we create solutions that are sensitive to their special needs. We call this intimate healthcare. Our business includes ostomy care, urology and continence care and wound and skin care. We operate globally and employ more than 7,000 people.
